Morphometry of the Corpus Callosum

Published On: December 30, 2016 | Pages: 004 - 006

Author(s): Aysegul Firat* and Fadime Irsel Tezer Filik

Corpus callosum (CC) is the largest fiber pathway linking the two cerebral hemispheres of the brain. These connections through the CC are either homotopic that connect the same or similar areas on each hemisphere or heterotopic that connect functionally similar, but anatomically different areas in two hemispheres. ...
