Influence of rooting media, number of nodes and seedling growing methods on rooting, seedling establishment and early growth of Chaya (Cnidoscolus aconitifolius McVaugh) stem cuttings at Dire Dawa, Eastern Ethiopia

Published On: December 30, 2022 | Pages: 013 - 025

Author(s): Chala Kitila*, Wassu Mohammed and Kebede Woldetsadik

Establishment of seedling growing method(s) is priority activity to the distribution of newly introduced vegetable crops. Chaya is proposed as candidate vegetable crop to distribute in eastern Ethiopia. However, recommendation is lacking for rooting media and type of cutting to produce seedlings. Therefore, this study was conducted to assess effect of rooting media an ...

The History of Anatomy, its importance and new trends in the teaching/learning process

Published On: January 19, 2022 | Pages: 001 - 004

Author(s): Letícia Iega Santana, Daniela Vieira Buchaim, Abdul Latif Hamzé, Carlos Henrique Bertoni Reis, Cleuber Rodrigo de Souza Bueno, Miguel Ângelo de Marchi, Karina Torres Pomini and Rogério Leone Buchaim*

Anatomy, in its broadest concept, is the science that studies the development and constitution of living beings. The study of human anatomy becomes mandatory for all courses in the Health Area since its understanding is fundamental for understanding the physiology and pathological processes that affect the human being. Some strategies such as Youtube videos, digital t ...
