The Influence of Hospital Room Wall Colors on Mood Elevation and Recovery Rate in Postoperative Patients: A Comparative Study

Published On: April 25, 2026 | Pages: 008 - 013

Author(s): Agussalim*

Background: Hospital environments influence patient outcomes beyond pharmacological and surgical care. Color psychology suggests that certain wall colors may affect patients' mood and recovery rates. This study explores how different hospital room wall colors influence mood and recovery among postoperative patients. Methods: This comparative study was conducted at Ra ...

Nurses' Knowledge of Modern Wound Dressing in the Management of Diabetic Foot Ulcers

Published On: February 21, 2026 | Pages: 001 - 007

Author(s): Agussalim*

Background: Diabetic foot ulcer (DFU) represents one of the most debilitating complications of diabetes mellitus, often resulting in infection, gangrene, and amputation. Modern wound dressing, which maintains a moist healing environment, is increasingly used to accelerate granulation and epithelialization. However, the knowledge of nurses regarding modern dressing tec ...

In Service to Wisdom: Proposing an Egalitarian Governance Model for Post-Secondary Nursing Programs

Published On: May 22, 2026 | Pages: 014 - 021

Author(s): Coffey S*, Anyinam C, Graham L and Da Silva C

Post-secondary nursing programs in Canada operate within institutional structures shaped, often without examination, by hierarchical and historically masculine models of academic governance. These models have a certain efficiency. They also systematically suppress the distributed wisdom, experience, and perspectives available within nursing program communities, underm ...
