Stevens-Johnson syndrome due to Lamotrigine

Published On: July 27, 2024 | Pages: 001 - 005

Author(s): Silvio Espínola*

Lamotrigine is an anticonvulsant drug that has been widely used to treat epilepsy, as a mood stabilizer (in cases of bipolar type 1 disorder), and in the management of neuropathic pain; It is used both in monotherapy and in complementary therapy. Considered a relatively new medication, approved by the Food and Drug Administration in 1994, its benefits include a greate ...
