Relationship between gut microbiome and allergic asthma

Published On: December 27, 2022 | Pages: 001 - 006

Author(s): Ryoji Hirota*

Since the late 20th century, environmental exposure to endotoxins has been very low and type I allergic disease has increased. In addition, we have increased exposure to PM2.5 and other chemicals. Recently, there is concern that the daily use of hygiene products containing antimicrobial substances is associated with an increased prevalence of allergies. It has been no ...
