Aromatherapy in conjunction with physical/occupational therapy in an acute care setting: Early results

Published On: December 28, 2022 | Pages: 019 - 022

Author(s): A Elizabeth Koyle*, Nicole Hofmeister and Rebecca Reding

Pain and nausea are common complaints by patients in acute care settings and these symptoms can prevent participation in their physical or occupational therapy sessions. Because mobilization during acute care hospitalization is important for reducing the length of stay, postoperative complications, risk for deep vein thrombosis, pneumonia, and pressure ulcers, impleme ...
